- BUSINESS TECHNOLOGY CASE STUDY -

THE CLIENT

INDUSTRY: Law Enforcement
TEAM SIZE: 9 Users \ 14 Endppoints
LOCATIONS: Jasper, FL

THE SITUATION

- When we took over IT support for Jasper PD, they were in danger of being fined or shut down by FDLE due to lack of compliance with network security standards.

- No security cameras, no network security, no mobile device management, and numerous other compliance issues.

- Dated laptops in patrol cars, no mobile device management.

THE CLIENTS WORDS

high-quality work, tailored solutions to meet our department's specific needs, and ensured everything was operating smoothly before completion. We are extremely satisfied with their service and highly recommend Gnosys Network for any organization seeking reliable and advanced technology solutions.

**Dan Bennett
Police Chief**

HOW DID WE HELP?

In order to correct the issues, we needed a plan.

- We laid out a road map for correcting the compliance issues, focusing on the most critical issues but also taking into account things that we could address quickly.

- We reached out to FDLE to let them know that we were addressing the issues and were able to get extensions for compliance.

- First, we made sure that our staff met FDLE standards, and so everyone got background investigations and CJIS certification.

- We deployed network security and new government email addresses for all officers.

- We deployed SentinelOne, Domotz Network Security Monitor, and InTune Mobile Device Manager.

- Some network segmenting and we were good to go.

- Security cameras were deployed around the police station for the finishing touches.

In short order, we had the police department up and running in compliance.

CALL US AT 352.847.7692 TO FIND OUT HOW WE CAN HELP YOU!

My team and I would LOVE to help you with your I.T. Give me a call on 352.847.7692 and let's have a quick 15-minute non-salesy chat!
